

# Trial: Phylgreen 200 on Grass

## Trial setup

- Year:** 2015  
**Place:** Northern Ireland  
**Crop:** Grass  
**Type:** small randomized plots (2x1m) – 4 replications  
**Plots:** 1. Untreated  
2. **Phylgreen 200**

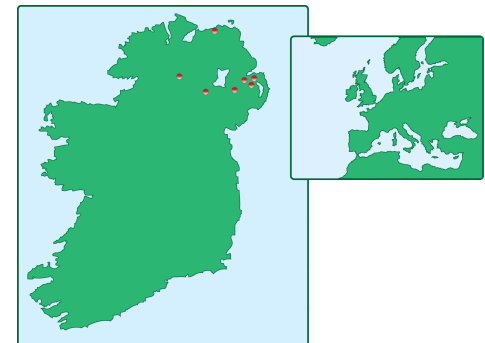

**Dose and stage:** 3 x 1 L/ha during growth cycle (19/6-3/8-19/8)

**Harvest:** First cut: 10/7 and second and last cut 10/9

**Objectives:** Effects of **Phylgreen 200** on productivity of herbage

### **Assessments:**

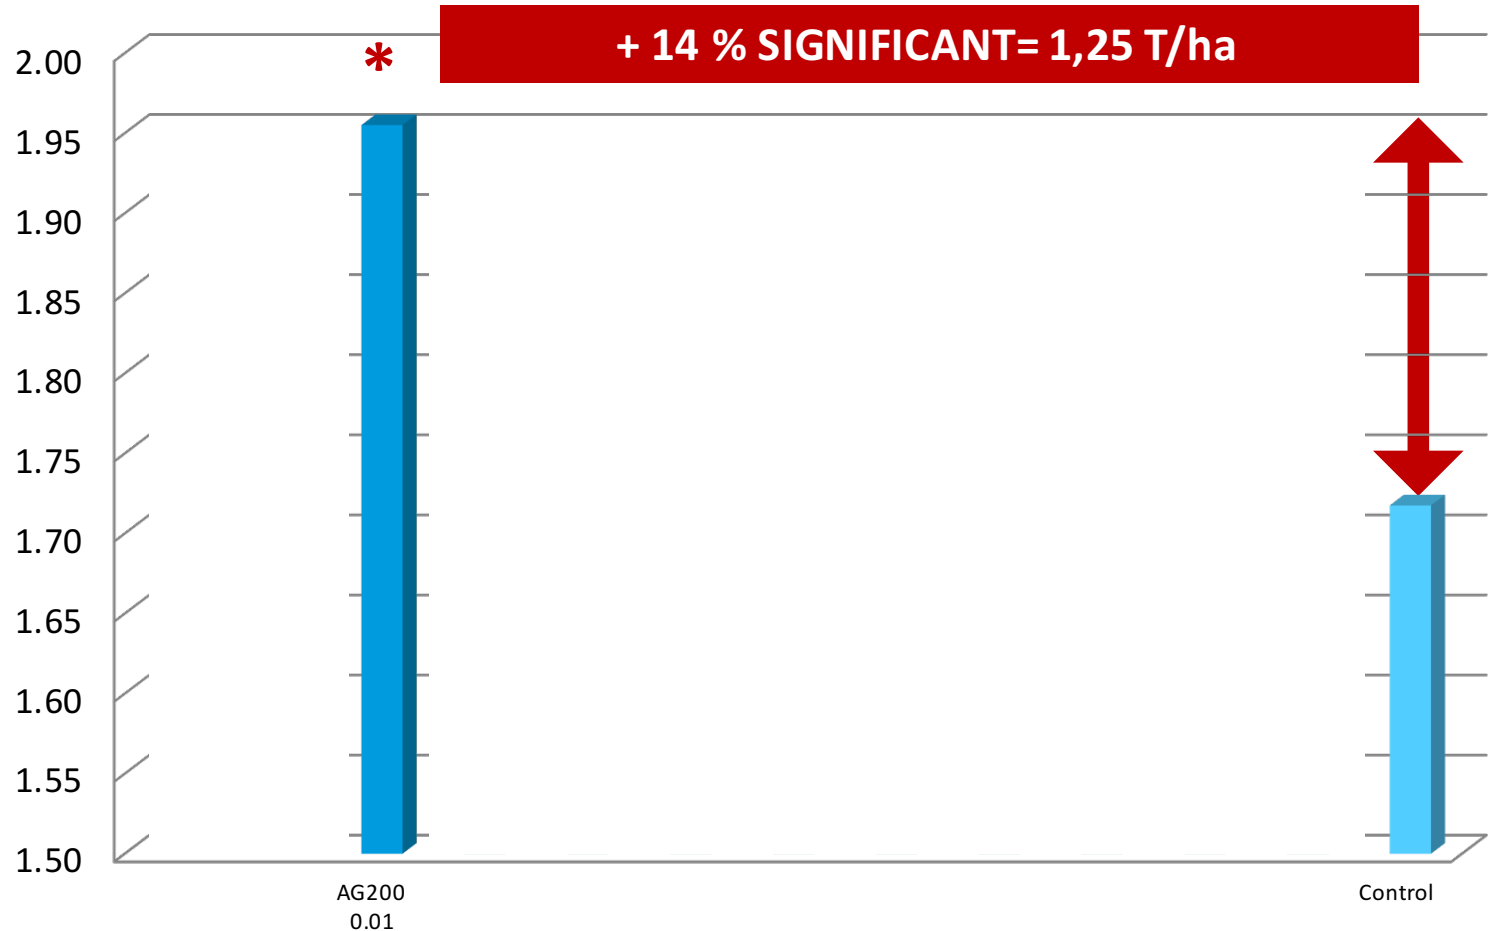

1. Dry matter yield
2. Dry matter digestibility

# Trial: Phylgreen 200 on Grass

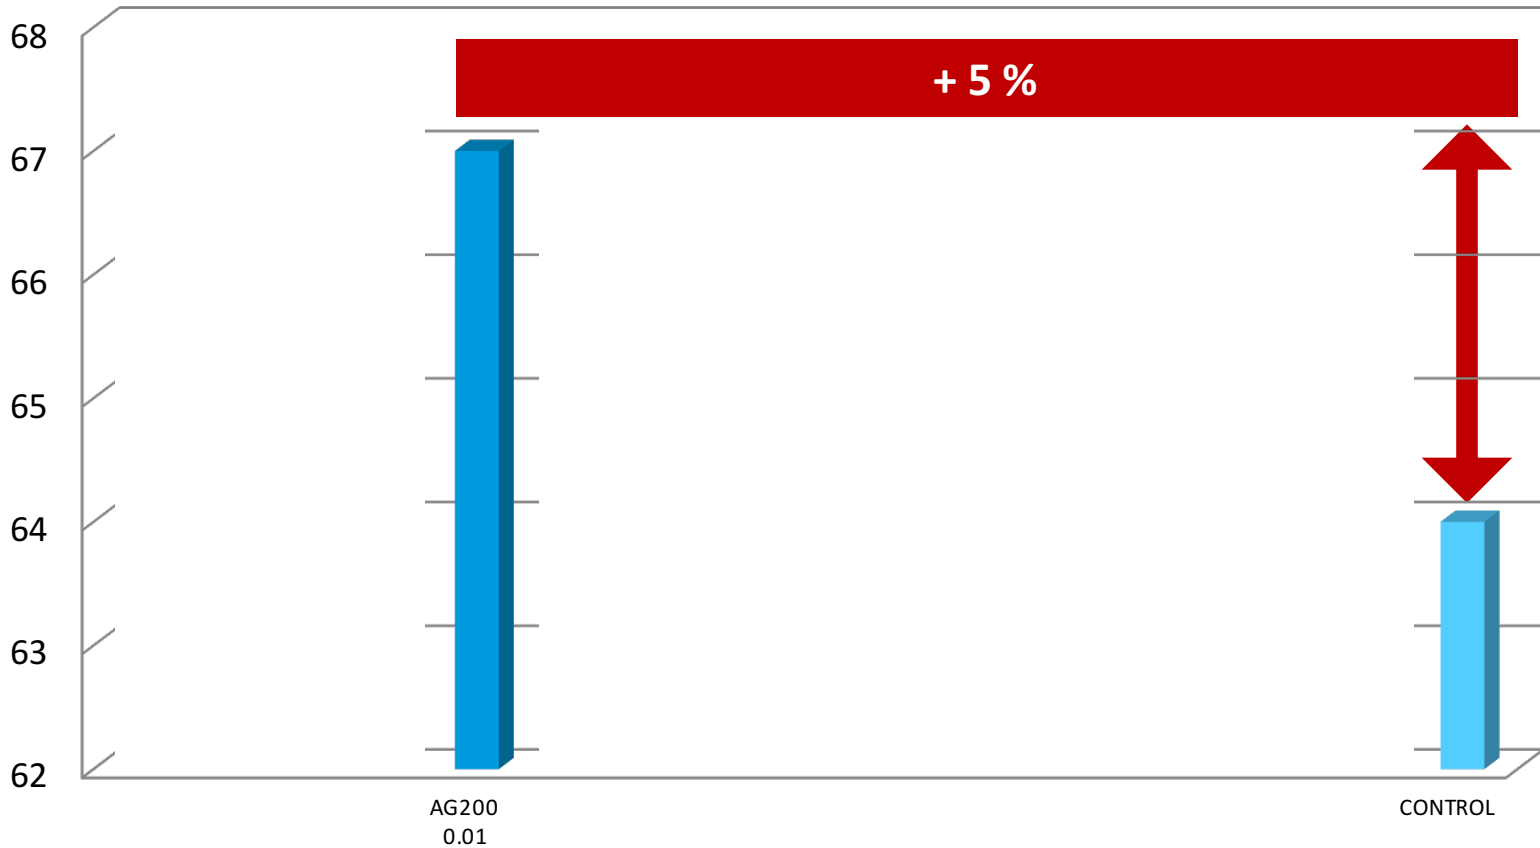

## DM Yield (kg/2 m<sup>2</sup>)

# Trial: Phylgreen 200 on Grass

## Dry matter digestibility of Grass

## Conclusions

**Phylgreen 200 improves:**

- 1. Yield significantly by 14 % = + 1,25 Ton of DM/ha**
- 2. Dry matter digestibility by 5%**

**At the dose of 3 x 1 L/ha**
